Montbretias

Graceful, sparkling flowers of the midsummer and autumn, reflecting the colors of the advancing season and lending a charming gaiety and lightness to the borders. For the best effect the bulbs should be set only a few inches apart, and in groups of not less than ten, toward the front of herbaceous borders or shrubbery. Thus planted, the sheaves of narrow leaves and slender, wiry arching stems strung with brilliant flowers, like miniature Gladioli, have the appearance of little fountains of bright color — rose, scarlet, yellow, orange, red, often marked with brown. They will flower for many weeks (from August into late October) and set at intervals in a border, where blue and white flowers predominate, are delightful indeed with such gay patches of color. They may be planted from the earliest spring days until late June, according to the flowering dates you prefer. Their long lasting qualities make the Montbretias most desirable for cutting, so that it is well to have a few hundred bulbs set out in some by-place where the graceful stems may be copiously cut for house and piazza decoration. See catalog, page 29.

SCHEEPERS' SUPERIOR QUALITY GLADIOLI

Successful bulb growing, where maximum result is the objective, requires the choice of truly superior bulbs. Quality is relative. We specialize in the discovery of sources, in the selection of the best varieties through these sources, and in the serving of our patrons where supreme quality is ever the watchword and ideal. Our reputation, responsibility and our patronage are the result of our long established organization and knowledge.

In this day of intelligent effort toward better gardens in general and an increased knowledge of how, where and what to plant, it naturally follows that little need be said of the beauty and satisfaction to be derived from planting, not merely bulbs, but the best bulbs.

JOHN SCHEEPERS, Inc.

Scheepers' Lovely Dahlias are selected for the beauty of the flower as well as sturdiness of plant and stem. The Finest introductions — new, as well as the older varieties that have proven themselves garden favorites. See catalog, pages 11-15.
